BUI THANH HAI

Mobile developer

0865831896 buithanhhai2172002@gmail.com https://github.com/haivc2002 HaNoi, VietNam

OBJECTIVE

Mobile developer with over 2 years of experience developing cross-platform applications using Flutter and native Android (Kotlin). Desire to improve skills, learn new technologies to become a well-rounded mobile developer, and contribute to complex and innovative projects.

EXPERIENCE

XTEL Software Solutions 11-2023 - 12-2024

Mobile developer

- Develop and maintain consumer-facing mobile applications for the Ministry of Information and Communications and outsourcing clients.
- Build cross-platform apps entirely with **Flutter**, integrating RESTful APIs, Firebase Authentication (OTP), and Firebase Cloud Messaging for notifications.
- Collaborate with backend and UI/UX teams to deliver stable and user-friendly mobile experiences.
- Implement clean code practices, maintain app performance, and handle bug fixing and updates in production environments.

ATIN – Advanced Technology Innovations Hanoi, Vietnam 01-2025 - now

Mobile Developer (Android & Flutter)

- Develop and maintain Android and Flutter applications for enterprise and government clients. working with both egacy **Node.js** and modern **Kotlin - Jetpack** codebases.
- Collaborate with backend and design teams to deliver full mobile solutions for enterprise clients such as **Viettel** and **SunGroup**.
- Developed the mobile app using **Flutter**, providing attendance tracking and course information for academy students.
- Collaborate with backend and UI/UX teams to ensure system reliability, usability, and integration consistency.
- Contribute to full-stack development, system optimization, and deployment for internal monitoring tools.

PROJECTS & PACKAGES

NOTABLE PROJECTS

Source: https://haivc2002.github.io/CV/#/projects

PACKAGES

fog_edge_blur (Flutter Plugin) | Flutter - Dart, Kotlin, GLSL

Pub.dev: https://pub.dev/packages/fog_edge_blur

- Created a custom Flutter plugin for advanced edge blur effects with shaders.
- Implemented cross-platform support for iOS and Android using GLSL and Kotlin.
- Designed API to be easy-to-use for Flutter developers, including dynamic edge configuration.
- Optimized performance to maintain high frame rate on real devices and emulator.

flow_box_popup (Flutter Plugin) | Flutter - Dart

Pub.dev: https://pub.dev/packages/flow_box_popup

- A Flutter plugin with smooth popup effects has been created.
- Cross-platform support has been implemented for iOS and Android.
- An easy-to-use API has been designed for Flutter developers.
- Performance optimization has been implemented to maintain high frame rates on real devices and emulators.

EDUCATION

Electric Power University 2020 - 2025

INFORMATION TECHNOLOGY

Major in Software Engineering

TECHNICAL SKILLS

Languages	Kotlin, Dart
Mobile	Android Native (Kotlin), Flutter
Tool & Project management	Git/GitHub/GitLab, Postman, Figma, Rive/Lottie, Jira, VS Code, Android Studio, Xcode.
